

2020 MPSGA Position on Tournament Pairings

When setting up tournament pairings, in most events we expect to group players with somewhat similar handicaps, but also vary playing partners from tournament to tournament. There may be a couple of occasions during the year when we group one player from each net flight or only with those in the same age category so that everyone has a chance to meet, compete with and generally get to know other MPSGA members.

Our shotgun starts allow friends to drive together and meet for lunch or refreshments after the round.

Occasionally we get requests from players who want to be paired together as well --particularly when one member is introducing a friend to the organization for the first time.

So, while we do not encourage partner requests and do not plan to carry over any partner requests from past years, we will allow - and try to accommodate special requests for single pair partnerships, provided both players formally sign the request for 2020.
